TECHNICAL EXPERIENCE

- Managed Linux-based environments, supporting deployments, troubleshooting, log analysis, and system validation.
 - Used Docker, Nginx, PM2, and Azure CLI to support application environments and QA activities.
 - Performed backend and service validation through terminal and command-line tools.
 - Developed Python scripts for test data preparation, data processing, and ETL automation.
 - Supported QA investigations by analyzing logs, reproducing issues, and validating system behavior across environments.
 - Worked with structured technical workflows to improve test reliability, troubleshooting, and delivery quality.
-

PROFESSIONAL EXPERIENCE

NTT DATA

Quality Assurance

Jun 2025 – Present

Salesforce Core professional with experience in Development, QA, Automation, and Artificial Intelligence.

Experienced in building and validating Salesforce solutions, performing functional, regression, exploratory, and automated testing, as well as validating business rules, integrations, APIs, and data. Skilled in Java, Selenium, and CI/CD, applying automation and AI to optimize processes, increase test coverage, and improve delivery quality. Experienced in Scrum and Kanban environments, with a focus on continuous improvement and solution reliability.

NTT DATA

Process Analyst

Jul 2023 – Jun 2025

Analyzed and automated business workflows within legacy systems, focusing on efficiency and data accuracy, achieving improvements of up to 25%. Developed data processing and reporting solutions using Power BI and SQL, handling large datasets and ensuring data consistency. Worked with structured data pipelines, validation processes, and KPI monitoring, supporting data-driven decision-making. Contributed to automation of repetitive processes, reducing manual effort and operational errors.

NTT DATA

Operations Analyst

Jun 2023 – Jul 2023

Started career at NTT DATA supporting operational management of service enrollments for TIM. Responsible for ensuring data consistency within SAP CRM, performing bulk maintenance,

inconsistency analysis, and sensitive data validation. Collaborated with cross-functional teams to identify operational bottlenecks and suggest process improvements. Due to strong technical skills and certifications in Power BI and SQL, quickly transitioned into automation and process analysis roles with increased autonomy and impact.

Algar Tech

Backoffice

Jun 2020 – Mai 2023

Worked providing operational and technical support for administrative and customer service processes. Responsibilities included data analysis, system corrections, report generation and validation, and workflow improvement initiatives focusing on speed and accuracy. This role strengthened analytical skills, attention to detail, and large-scale operational understanding. It also marked the beginning of applying automation concepts, KPI tracking, and data organization practices, forming the foundation for transitioning into software development and technology.

EDUCATION

Descomplica University Bachelor's Degree in Information Systems – Completed

SKILLS

QA & Testing: Manual Testing, Functional Testing, Regression Testing, Exploratory Testing, End-to-End Testing, Smoke Testing, Sanity Testing, API Testing, Web Testing, Mobile Testing, Cross-Browser Testing, Test Case Design, Test Execution, Test Data Preparation, Bug Reporting, Defect Tracking, Retesting, Root Cause Analysis.

API & Backend: REST APIs, JSON, Postman, Insomnia, Swagger/OpenAPI, Axios, Request/Response Validation, HTTP Methods, Status Codes, Authentication, API Debugging, Log Analysis.

Test Automation: Selenium, Playwright, Cypress, Java, Python, JavaScript, TypeScript, Automated Regression Testing, Test Data Automation.

Web & Mobile: Browser DevTools, Responsive Testing, Android, iOS, PWA, Mobile Web, Chrome, Safari, Device Testing, Element Inspection, Network Analysis.

Development & Databases: Node.js, NestJS, React.js, SQL, MySQL, MongoDB, Database Validation, Data Integrity

DevOps & Tools: Git, GitHub, GitHub Actions, Docker, Linux, Azure CLI, Nginx, PM2, CI/CD, Command Line, Environment Validation

Test Management: Jira, Xray, GitHub Projects, Test Case Management, Defect Management, Traceability, Agile Testing

Data & Analytics: Power BI, ETL, Data Validation, Data Analysis, KPI Development, Data Warehouse

Methodologies & Practices: Agile, Scrum, Kanban, Clean Code, Continuous Improvement, Process Automation, Technical Documentation
